Contributions of large-scale mining to sustainable development and to the quality of life of communities

Joaquín Villarino
Executive President
Consejo Minero

Agreements with Third Parties

Tax – Institutional – Government

Initiatives of the Sector

Sustainable Development Objectives (ODS)

ODS in which large-scale mining is contributing more directly.

Initiatives of the Sector

Sustainable Development Objectives (ODS)

Key role in the economy: economic growth and local development

- Direct impact through local contracting and community investment
- Indirect Impact: For each Dollar of Mining GDP, an additional 0.7 Dollars in GDP is generated in other sectors.
- Education projects (infrastructure) and educational collaborative agreements.
- Strengthening (Training) of teachers, principals and scholars.
- Contribution to improve the level of schooling of children and young people.
- Scholarship programs, internship jobs and specialties in high schools.
- Sustainable water management: R & D for efficient use / water recirculation / minimize aquifer use / water balance / integrated water management plan
- Infrastructure: rural potable water supply systems / social investment axis / construction of desalination plants.
- It encourages Energy Efficiency throughout the production chain and at all levels of the organization.
- Investment and development of alternative energies

1 END OF POVERTY

4 QUALITY EDUCATION

6 CLEAN WATER AND SANITATION

7 CLEAN AND AFFORDABLE ENERGY

Creo Antofagasta Company

Public-private partnership supported by BHP since the beginning

Duration

2011-2021

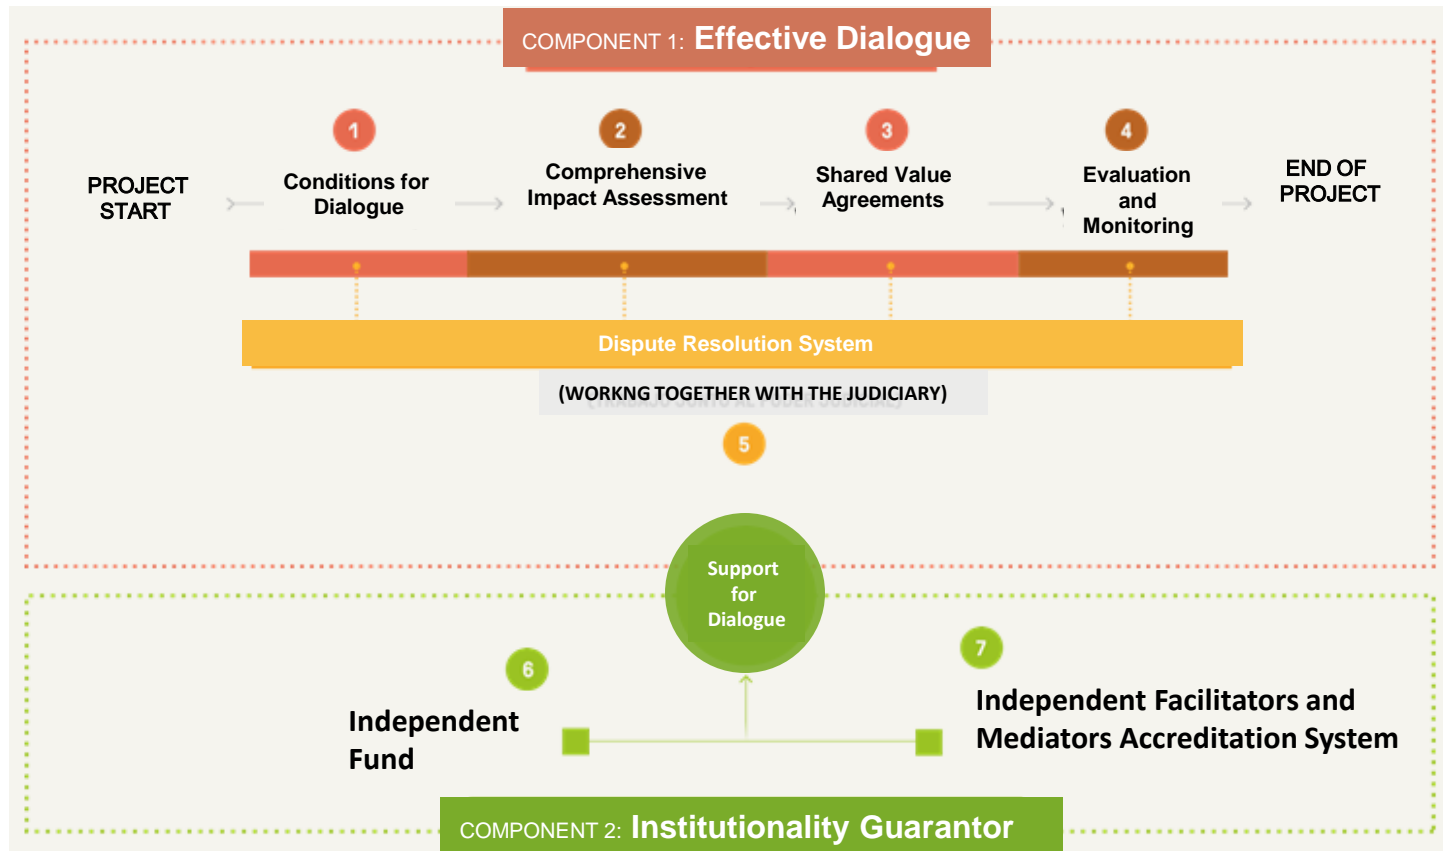

Partnership to carry out the program

Intendency and Municipality of Antofagasta; Fundación Chile; Anglo American; Antofagasta Minerals

Other Collaborative Initiatives

Alianza Valor Minero

The development of the mining potential in the central zone should consider benefit-sharing agreements, and the enhancement of positive externalities for the development of the territory. It seeks to strengthen the economic development of localities in the area of influence, with emphasis on strengthening innovation, entrepreneurship and employability capabilities, to integrate them into the value chain of mining.
